

Table 1: (B cell Report Table 41) Percent of GT8++IgG+ detected as VRC01-class magnitude testing between FNA samples (Wk03 (V05) vs. Wk 11(V09)). Testing was done using Wilcoxon signed-rank test for paired data (two-sided, $\alpha = 0.05$) and p values less than 0.05 are highlighted.

Comparison	Dose	Number of Pairs	Median (Range)	P Value
Wk3 (V05) vs. Wk11 (V09)	20 μ g	12	0.0000 [0.0000, 74.8148] vs. 0.0000 [0.0000, 19.7587]	0.1875
	100 μ g	13	15.4413 [0.0000, 72.9439] vs. 0.4728 [0.0000, 50.4831]	0.0918
